Floor panel

STRING FURNITURE

The floor panels are available in three heights, 85 cm, 115 cm, 200 cm along with one depth, 30 cm. The panels are the base when building your string shelf. When the panels are decided you can start adding products with 30 cm depth from String® System. Choose among shelves, cabinets, drawers, magazine shelves and more. The foot of the floor panel rests against the floor which makes the shelf stable while appearing light and airy. Make your shelf even more functional and unique by adding organizers, knife holder or a magazine holder, which all are placed on the panel's threads. The panels come in two different packaging's, either with one floor panel or two floor panels.

Product name
Floor panel, D30 x H200, Dark brown, 2-pack

Launch year
2026

Assortment
String® System

Material
Powder-coated steel (fine textured)

About the designer

Nisse Strinning, designer of the String® System, was a Swedish architect born in 1917 in the northern part of Sweden. Nisse designed the first String® shelf in 1949 with great help of his wife, Kajsa Strinning. The couple met while studying at KTH. Everything came about when the Swedish publishing house, Bonniers, announced a competition where they were looking for the perfect shelf. High in functionality, modern looking and with fair pricing. String® was selected winner and has been considered a classic Swedish design icon for decades.
