

Floor panel galvanized

STRING FURNITURE

The galvanized floor panels are available in one height, 85 cm along with one depth, 30 cm. The panels are the base when building your string shelf outdoors. Then, you can start adding galvanized shelves with 30 cm depth from String® System. Add outdoor-proofed accessories such as j-hooks and s-hooks to cover your storage need. The foot of the floor panel rests against the ground which makes the shelf stable while appearing light and airy. The galvanized floor panels withstand any weather and can stay outside all year round. The panels come in two different packaging's, either with one floor panel or two floor panels.

Product name
Floor panel galvanized, D30 x H85, Galvanized, 2-pack

Launch year
2019

Assortment
String® System

Material
Galvanized steel

Assembly required
Yes

W: 31 D: 87 H: 5 cm
W: 12.2 D: 34.3 H: 2 in

Galvanized

outer: H: 85 cm / 33.5 in
inner:

inner:
outer: W: cm / in D: 30 cm / 11.8 in

Care and maintenance

Our panels are hot dip galvanized, a surface treatment designed to give the panels the power to withstand moisture and the ability to self-heal from minor damages. Hot dip galvanizing also protects the panels from corrosion and requires no maintenance apart from regular cleaning. The method gives the surface a variation in colour, the grey tone of the panels might differ marginally due to this technique. With time any variation will even itself out. Wipe off any dirt with a damp cloth if necessary.

Warranty

String Furniture warrants that this product is free from defects in materials and workmanship for a period of two (2) years from the date of purchase. Please contact us for more information about our warranties.

Recyclability

The steel used in this product is made from 100% recycled material and is recyclable.

Spare parts

About the designer

Nisse Strinning, designer of the String® System, was a Swedish architect born in 1917 in the northern part of Sweden. Nisse designed the first String® shelf in 1949 with great help of his wife, Kajsa Strinning. The couple met while studying at KTH. Everything came about when the Swedish publishing house, Bonniers, announced a competition where they were looking for the perfect shelf. High in functionality, modern looking and with fair pricing. String® was selected winner and has been considered a classic Swedish design icon for decades.
