

Magazine shelf metal

STRING FURNITURE

The magazine shelf in wire is available in one width, 78 cm, and fit into 30 cm deep wire panels from String® System. The magazine shelves create a dynamic shelving combination where you have room to showcase your favourite books and magazines. The magazine shelf in wire gives you plenty of room to be creative by adding s-hooks. The magazine shelf will blend right into your string shelf since their unique wire design is the same. Choose a magazine shelf in the same colour as your panels or make your magazine shelf pop by picking a different colour.

Product name

About the designer

Nisse Strinning, designer of the String® System, was a Swedish architect born in 1917 in the northern part of Sweden. Nisse designed the first String® shelf in 1949 with great help of his wife, Kajsa Strinning. The couple met while studying at KTH. Everything came about when the Swedish publishing house, Bonniers, announced a competition where they were looking for the perfect shelf. High in functionality, modern looking and with fair pricing. String® was selected winner and has been considered a classic Swedish design icon for decades.
