

Wall panel

STRING FURNITURE

The wall panels are available in two heights, 50 and 75 cm, along with two depths, 20 and 30 cm. The panels are the base when building your string shelf. When the panels are decided you can start adding products from String® System. Choose among different shelves and cabinets. The wall panels are mounted onto a wall and do not touch either the floor or ceiling, which makes the whole shelf easy to adapt to any room. Make your shelf even more functional and unique by adding organizers or hooks, which all are placed on the panel's threads. The panels come in two different packaging's, either with one wall panel or two wall panels.

Product name
Wall panel, D20 x H50, Dark brown, 1-pack

Launch year
2026

Assortment
String® System

Material
Powder-coated steel (fine textured)

Assembly required

About the designer

Nisse Strinning, designer of the String® System, was a Swedish architect born in 1917 in the northern part of Sweden. Nisse designed the first String® shelf in 1949 with great help of his wife, Kajsa Strinning. The couple met while studying at KTH. Everything came about when the Swedish publishing house, Bonniers, announced a competition where they were looking for the perfect shelf. High in functionality, modern looking and with fair pricing. String® was selected winner and has been considered a classic Swedish design icon for decades.
